

Council Assistance for Indoor Skate Park Facilities: Policy Considerations (2004)

Minute Number: 816/04

That the following policy on Funding Skateparks be adopted:

Council will continue to fund outdoor skate parks on reserve land in accordance with accepted practice and approved standards.

In cases where this is not practicable or where considered necessary by the community and Council, for reasons such as safety, Council will support the provision of indoor skate facilities by non Council providers on non Council land. Any such support will be conditional on the following:

- Applications for assistance must be supported by a business case.
- Council support will primarily take the form of officer time and facilitation.
- Requests for financial support will be considered on their merits.
- The maximum period for Council financial assistance will be for three years following which the Council will review the matter on the request of the service provider.

Primary funding such as sponsorship and entry fees is to be obtained by the provider.
